Subject: Microsoft Settlement

Please be aware that, after reading the finding of facts as well as most of the appeal decision and the subsequent proposed settlement, I cannot agree at all with Microsoft being allowed to continue in the manner that the settlement will permit.

Please strongly consider harsher and more specific anti trust measures that will put competition back into the marketplace and give all consumers more choice in how we do something as pervasive as computing.

I do not want to live my life in a Microsoft dominated world at the expense of choice.

Thanks for your time and consideration.
